

ELECTRICS

Can you see any problems with your sockets and/or switches?

				
Old style sockets, switches or wiring	Some fittings are cracked or damaged	Some fittings have burn marks	There aren't enough sockets	Sockets are overloaded
				
Extension wires are trailing across floors and doorways	The fuse box looks old or damaged	The fuse box often trips and shuts off the power	Portable electric items are being used in the bathroom (e.g. hairdryers, heaters or radios)
